

Mailing instructions for the Pricing Service

Please ensure that these mailing instructions are visible at your company's mailing station.

- Make sure, that the mailing batch contains only items directed to Pricing Service
- Place a signed and dated Pricing Service work order form topmost in each box and mailing batch.
- Do not place parcels and letter items in the same transport unit!
- Detach the sender copy of self-copy address labels before you leave the items at the postal outlet.
- Ensure that the work order form does not detach from the mailing batch during transport.
- Enter the name of the selected supplementary service in the additional information section of the work order form. Please remember to include a filled-out address label or self-adhesive label for the service in question in each item.

Letters

- Separate the letter items going domestic or abroad each in their own box or if the number of letters is low, you can make a small bundle. Make sure that the stacks including the work order form will not come apart during transport.
- Always place the signed work order form topmost.
- When mailing international letter items, clearly indicate in additional information whether the item is an international Economy or Priority letter.

Valuable items

- Separate Register Letters, Insured items and Letters with Advice of Delivery into a separate box
- Always place the signed work order form topmost.

Parcels

- Do not place parcels and letter items in the same transport unit.
- Separate parcels in their own transport units (rolltainer) and attach a dated and signed work order form to each parcel.
- Print an address label from Prinetti or manually fill out an NCR address label (self-copying). Write down customer number and infocode on the address label (equivalent to those on the work order).
- Detach the sender copy of domestic parcel address labels before you leave the items at the postal outlet.

If items are brought to the postal outlet without a work order form and sender information, we will charge the recipient for postage fees and claiming surcharges.

Therefore, please ensure that the postal items contain the sender information and that you have followed the Pricing Service mailing instructions.

Pre-paid items (Pre-Paid Envelope items and items paid with postage stamps or a franking machine) or items to be delivered with mailing lists are not handled in the Pricing Service.

We cannot guarantee the delivery speed of misdirected items (e.g. Express letters / sample deliveries). Do not place these items in the Pricing Service at all.

Remember to sign the work order form. Ensure that the work order form has the correct info code, if one is being used.

Posti prices the items and furnishes them with payment indications.

Surcharges will be in accordance with the Pricing Service price list for:

- Work comparable to the mailing service (e.g. producing address labels).
- Costs incurred by investigating if items or mailing batches are left without a work order form or if the Pricing Service Agreement has expired.
- Return costs if we need to send the mailing batch back to the sender.

You can order Pricing Service work order forms from our customer service.
