Ordering: Indicating the delivery area according to postal code 1/3

The delivery area is indicated at “*Postinumerojakauma*” (*Postal code distribution*) on the “*Ennakkotiedot*” (*Advance information*) page by importing into the system the postal codes to be used for the delivery. Click the “*Muokkaa*” (*Edit*) link to start entering the information. In the window that is displayed, click the “*Lisää uusi jakauma*” (*Add new distribution*) link to enter the postal codes to which the delivery is allocated.

Next, indicate the content of the file to be imported. Is the shipment the same for all postal codes, or does the file include multiple versions of shipments (for example advertisements from different retailers).

Click the box on the left if all of the shipments for the order are identical.

Click the box **on the right** if your mailing batch includes multiple versions, meaning there are regional differences and you will indicate these differences by postal code.

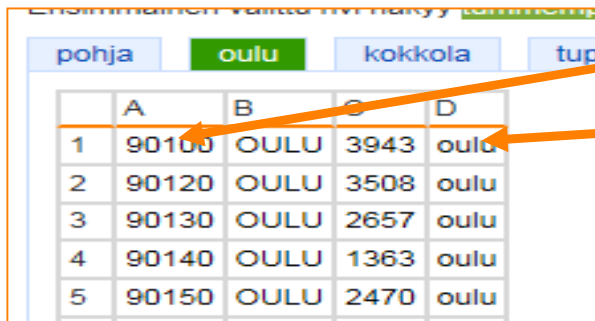

NOTE! If your mailing batch includes items of different sizes and/or weights, you need to create a separate mailing plan for each mailing batch containing different sizes/weights.

Ordering: Indicating the delivery area according to postal code 2/3

The source material from which you wish to import information into the system must be in a specific format in order to complete the import and for the information to be correct. The **"Näytä ohjeet"** (**Show instructions**) link at the top of the page contains instructions concerning the content of the material.

Click the **Browse** button to find the file that you wish to send. Once you have selected the file, click **"Seuraava"** (**Next**). A preview will be displayed to show you the content of the file you have sent.

At this stage you can still change the name of the file.

Finally, click **"Hyväksy"** (**Accept**).

Jakauman yhteenveto

Postinumerojakaumalle kannattaa antaa nimi, joka kuvaa jakauman sisältöä tai ajankohtaa, jolloin tiedot on kerätty. Jos tuot lehdelle useita tiedostoja, anna kullekin oma erilainen nimensä. Oletusarvoisesti työpöytä käyttää sen tiedoston nimeä, jonka lataisit tietokoneeltasi työpöydälle.

Before the information is finalized and saved, you will see the names of the imported tables and the quantity to be delivered.

You DO NOT necessarily need to submit all of the postal codes for your order in a single table. You can submit them using the tables that are available to you. The system will merge the tables so that they will all apply to the same order
