Shipping Electronic Equipments

Shipping Goods With or Containing Lithium Batteries

Single electronic equipment that contains a battery can be shipped by DHL EXPRESS EASY service. A full compliance of the instructions and regulations issued by International Air Transport Association (IATA) apply when preparing these shipments for air transportation. DHL Express is unable to accept loose batteries and power banks on its network. Additionally, Lithium Batteries that are known or suspected to be defective or damaged are not permitted on aircraft under any circumstances.

When intending to send any shipments containing Lithium Batteries, please note the following:

- The equipment must be packed in strong rigid outer packaging constructed of suitable material of adequate strength
- The consignment is limited to a maximum of 2 packages (each containing maximum 4 cells or 2 batteries contained in equipment)
- The equipment must not get switched on during transportation

The full compliance to IATA regulations is the legal responsibility of the shipper:

- You must be able to confirm whether you are shipping **Lithium Ion** or **Lithium Metal batteries**, or e.g. AA/AAA alkaline batteries.

Example 1: A mobile phone containing a Lithium Ion battery (3.9Wh)

Description of the contents on waybill:

Lithium ion batteries compliance with section II of PI967, less than 2 batteries or 4 cells

Example 2: A watch containing Lithium Metal battery (button cell in equipment)

Description of the contents on waybill:

Lithium metal batteries compliance with section II of PI970, button cell in equipment
