

Network – an Online Service Channel for Small Businesses – Price List for January 1, 2018

The service is intended for small businesses and is available at www.posti.fi/network.

Pricing is based on self-service and the Service account payment method. Information on service pricing is given in the service price list and when buying the service.

Network service prices consist of transaction-specific fees and, in the case of certain services, periodic fees or deployment fees.

If the service includes services that are invoiced monthly, we charge your Service account the monthly fee you have selected, in which case the previous user license expires automatically.

If your Service account balance is insufficient to cover the monthly fee or other charges payable by you, Posti has the right to suspend the service. Posti reserves the right to charge the customer a service reactivation fee as specified in the price list.

The tariffs and rates in this price list are quoted excluding VAT, unless otherwise stated. The value added tax in effect at any given time will be added to the prices.

Services are subject to service- or product-specific terms and conditions

Posti services included in Network are subject to the terms and conditions specific to the product or service in question. Service deployment may be subject to a separate agreement. When you purchase the service via Network, you agree to the terms and conditions of the service.

E-invoice refers to e-invoices directed at company recipients delivered to the e-invoice channel selected by the recipient. E-letter refers to the sending or the receiving of an electronic letter in Netposti or Network. Paper letter prices include color printing of the letter on standard paper, placing the letter in a standard envelope and delivering it as an Economy letter to the recipient.

Incoming e-letter refers to an e-letter sent directly to Network.

Further Information

Further information can also be found at www.posti.fi/network.
