1 Instructions for activating a Posti SmartShip test account and integration for IT partners

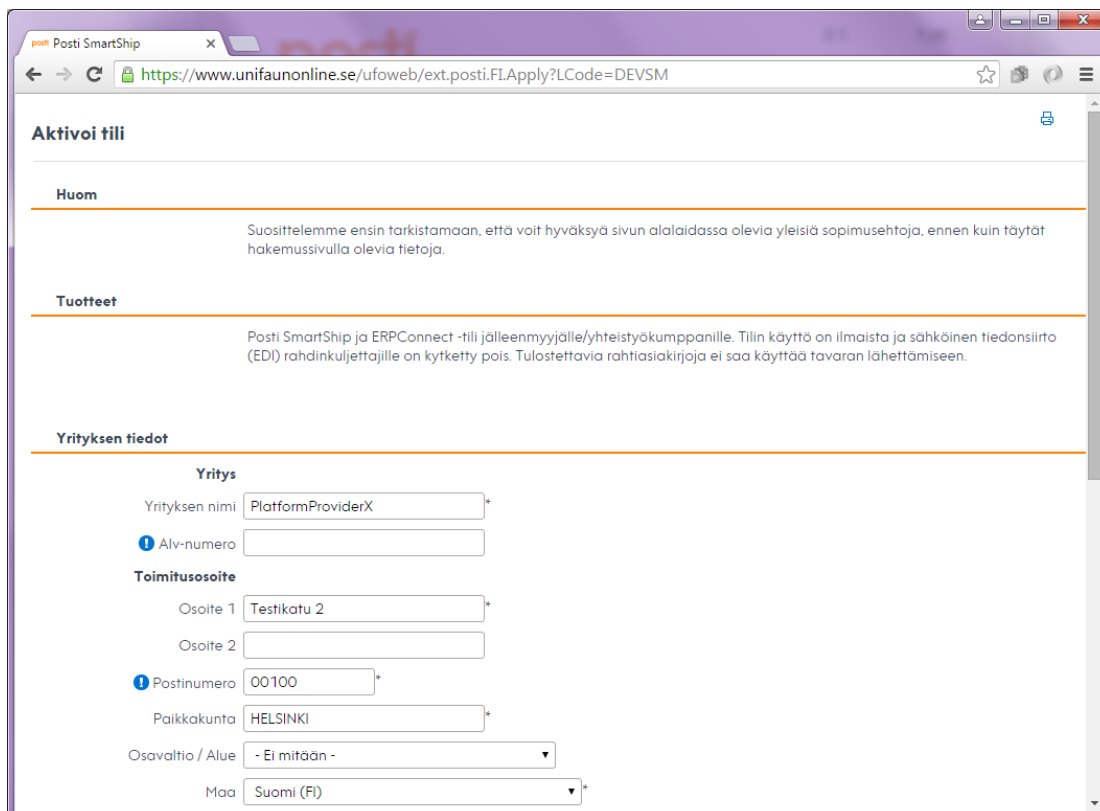

The process described in these instructions is used to activate an account:

- For online store suppliers, ERP/WMS suppliers and other IT suppliers for Posti's contract customers.

These test accounts are established in the production environment, but under so-called test tickets, so that an EDI message is not generated in Posti's production systems. These test accounts are intended for use only in the development of Posti SmartShip integrations and integration modules. Contract customer accounts for actual customer implementations are activated separately in the Posti service portal.

To create a test account, go to <https://www.unifaunonline.se/ufoweb/ext.posti.FI.Apply?LCode=DEVSM>

1) Fill in the required fields on the form with your contact details.

The screenshot shows a web browser window with the URL <https://www.unifaunonline.se/ufoweb/ext.posti.FI.Apply?LCode=DEVSM>. The page title is "Aktivoi tili".

Huom

Suosittellemme ensin tarkistamaan, että voit hyväksyä sivun alalaidassa olevia yleisiä sopimusehtoja, ennen kuin täytät hakemussivulla olevia tietoja.

Tuotteet

Posti SmartShip ja ERPConnect -tili jälleenmyyjälle/yhteistyökumppanille. Tilin käyttö on ilmaista ja sähköinen tiedonsiirto (EDI) rahdinkuljettajille on kytketty pois. Tulostettavia rahtiasiakirjoja ei saa käyttää tavarankuljetukseen.

The same form can be used to order separate API keys directly for Posti SmartShip integrations. The Posti SmartShip system has 3 different integration options, and the same keys can be used for each of them. Opening the integration and using it for development purposes is free of charge for IT suppliers.

2) Send the completed form and you will receive a confirmation message when it has been saved.

System: select dispatch system. If the platform or system used for your online store is not on the list, select "Other system"

Order format: select "XML format"

3) Activate your account password using the order confirmation

When your application is accepted by Unifaun, you will receive a confirmation email with a link for choosing a password. Click on the link to choose a password for your account.

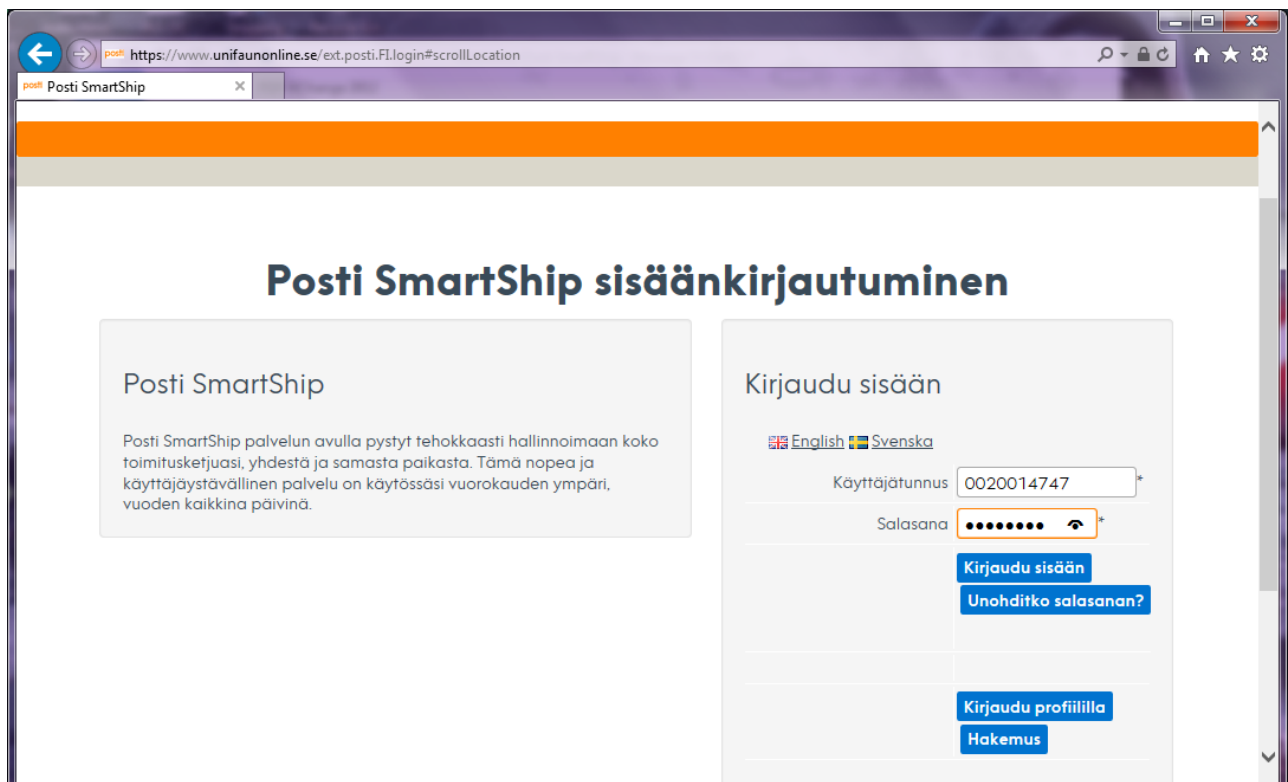

3.5.2016

Julkinen - Public

You will receive a confirmation when your password is activated and you can log in to the system using the “log in” link.

Log in using the username provided in the confirmation email and the password you have just created.

4) Log in and search for the API key information

Once you have successfully logged in to the Posti SmartShip system, select “Maintenance” in the top menu and then “API keys” under it.

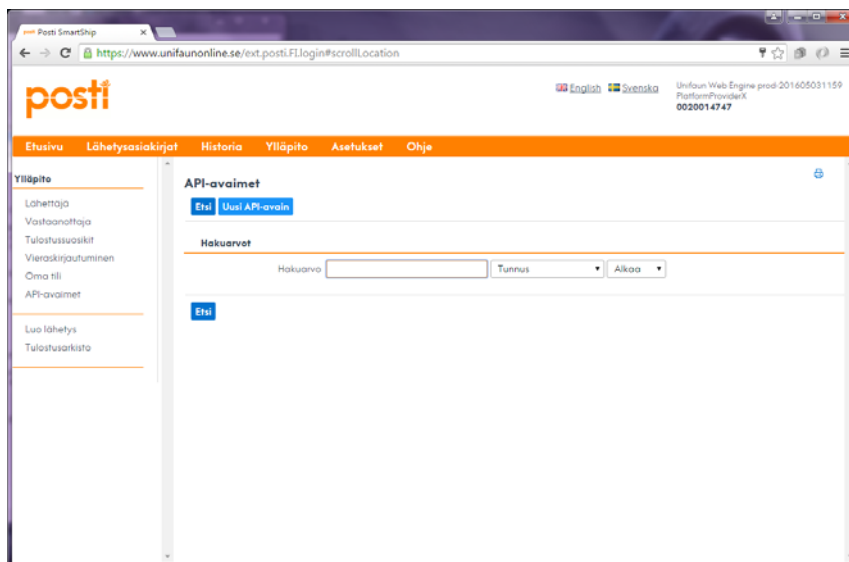

3.5.2016

Julkinen - Public

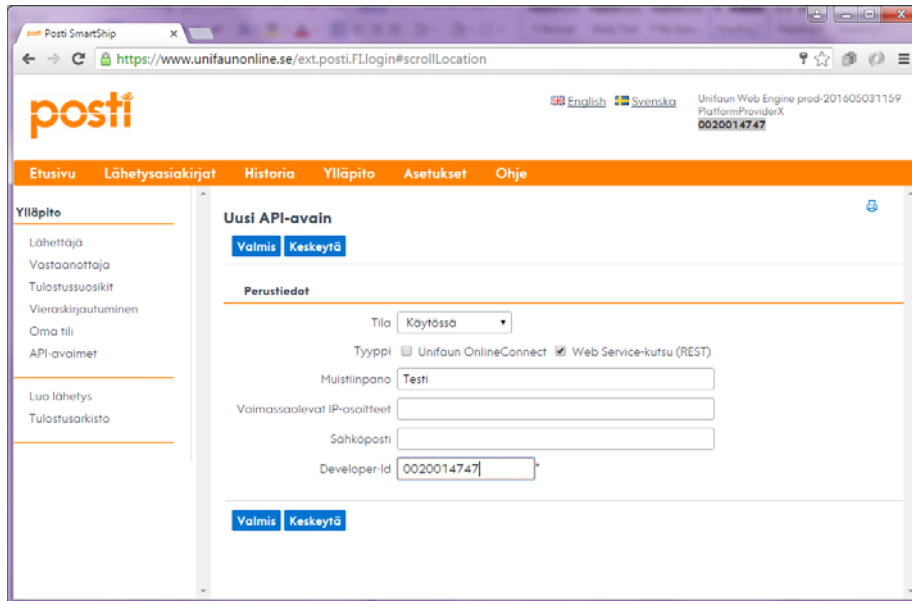

Select "New API key".

3.5.2016

Julkinen - Public

Fill in the following information. Enter the username for your Posti SmartShip account in the Developer ID field in the upper right-hand corner.

5) Test the functionality of your API key

The testing tool for the REST interface can be found here:

<https://api.unifaun.com/rs-docs/>

https://api.unifaun.com/rs-docs/##stored_shipments (to create new shipments)

https://api.unifaun.com/rs-docs/##stored_shipments_storedId_shipments (address label search for completed shipments)

Use the following target address for building direct integration:

<https://api.unifaun.com/rs-extapi/v1>
