

Sending diving cylinders

An empty diving cylinder

TDG* legislation does not apply to diving cylinders if the cylinder was filled with air and its valves are open. Send the cylinder in Posti's service point and choose the best shipping option for you. In the "Lisätietoja" field ("Additional information"), write "Tyhjä, venttiili auki, ei sisällä painetta" ("Empty, valve open, not pressurised").

A pressurised diving cylinder

TDG legislation applies to pressurised diving cylinders. In order to send a pressurised diving cylinder, you need to have a valid TDG contract. Send the bottle as a VAK/ADR parcel or as Domestic freight. Use a warning label in the shipment and enter the required TDG information in the transport document.

Further information

For further information on the shipping of dangerous goods, please contact your Posti contact person or TDG safety advisor Pauliina Auveri, tel. +358 20 452 0092, pauliina.auveri@posti.com or our customer service:
