

Ordering and activating a transaction code for new customers in Posti SmartShip

Registering for the business customers' service channel

You need a Posti transaction code to use Posti SmartShip. You can use the same transaction code for all services in the service channel for business customers.

If your company already has one or more administrators, please contact them. The administrator can grant access rights to SmartShip. If the administrator no longer works for your company, you must appoint a new administrator, meaning that you should complete the transaction code order form below and check the box next to "Change of administrator".

If your company does not yet have an administrator, you can order a transaction code using the [transaction code order form](#).

Using Posti SmartShip also requires a logistics contract number. If needed, you can order a contract with the same form.

Registering for the business customers' service channel

You will be sent an invitation to register by email when the administrator has granted you access rights to the service channel's services. Please note that the invitation will only be valid for a week. If the invitation has expired, please contact your company's administrator. If you are the administrator, the quickest way to receive assistance is to use the customer service chat.
